1. DRG488 OVERVIEW

User interfaces

Interface	Description
1	WAN port
2	Ethernet LAN ports
3	Power connector
4	SFP port
5	LAN LEDs
6	Power LED
7	Uplink LED
8	Reset pinhole

LED & button functionality

LED	Activity	Description	Reset Button	Description
Power	Green Flashing Red	Power is on and boot completed DRG488 is booting Hardware error	Reboot	Press reset button for less than 5 seconds and release to initiate reset.
Uplink	Green Yellow	1000M WAN link established* 100/10M WAN link established*	Factory default	Press and hold reset button for more than 5 seconds (when LEDs will blink) and release to initiate a factory reset. All configuration data will be lost!
LAN	Green Yellow	1000M link* 100/10M link*		

*blink on activity

2. DRG488 INSTALLATION

Step 1: Select a suitable location for the DRG

Before installing the DRG, ensure your working environment meets the minimum operating requirements of the equipment.

Characteristics	Requirements
Temperature	Between 0 and 45 degrees Celsius
Operating Humidity	Max. relative humidity of 90%, non-condensing
Ventilation	Minimum 10 centimeters on all sides for cooling. If in a closet, ensure there is adequate airflow.

Step 2: Placement options

The DRG488 installation kit provides parts that allow you to place the DRG in various locations. Select the procedure best suited to your operating environment:

Option A: Placing the DRG on your desktop

To protect any surface that the DRG is standing on, there are four rubber pads that need to be attached.

1. Peel the protective paper from the rubber pads to expose the adhesive side.
2. Press each of the pads on the bottom of the DRG casing, as shown below.
3. Place the DRG on your desktop

Option B: Mounting the DRG on the wall

To mount the DRG directly on a wall, ensure that the location is not next to electrical power cables or gas/water pipes.

1. Drill the necessary holes in the wall for supporting the DRG. The fixing-screw positions are shown below. A drilling template is provided as separate download from the Genexis website.
2. Insert and tighten the mounting screws in the holes in the wall with the screw head approx. 2mm from the wall.
3. Position the DRG in such a way that each screw head is aligned with a mounting screw hole.
4. Push the DRG onto the screw heads and slide gently downwards until the screws lock the DRG firmly into position.

Option C: Mounting the DRG with brackets

If the DRG is to be securely installed, for example in a cabinet, angle brackets are supplied to mount the DRG horizontally or vertically.

1. Attach both angle brackets to the screw holes on the side of the DRG488, using the supplied screws.

Vertical

Horizontal

2. Mount the DRG488 in the cabinet or on a rack, using the appropriate screws.

3. CONNECTING THE DRG488

Step 1: Connecting to the network

Depending on the way you would like to connect the DRG488 to the broadband network (fiber SFP or copper WAN), different cables are used.

Using the Copper uplink

Use a RJ-45 Cat 5e Ethernet cable to connect the DRG488 to the broadband network socket by pushing the cable connector gently, but firmly into the 'WAN' port until it locks.

Using the SFP fiber uplink

Use a fiber patch cable to connect the DRG488 to the broadband network by gently pushing the fiber connector into the 'SFP' module (Ensure that an MSA-compliant SFP module is properly installed in the SFP port).

Step 2: Connecting a device to the DRG488

Locate a free Ethernet LAN port for your device (see chapter 1) and push the RJ-45 Ethernet connector of your device gently into the DRG488 LAN port until it locks.

Step 3: Powering the DRG488

1. Connect the power cable from the power adapter (as delivered with the DRG488) to the DRG 'power' port.
2. Connect the power adapter to a main power outlet.
3. The power LED will now light up. The power LED remains lit while the product is connected.

Note:

If the power LED does not light up and there is no obvious problem, please contact the supplier of your network connection.

Europe-EU Declaration of Conformity

Hereby, Genexis BV declares that this product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.
