

## CloudSight Hosting

Secure and premium hosting

### **CloudSight Hosting Service**

CloudSight Hosting is powered by AWS (Amazon Web Services) and managed by Genexis. Our hosting service provides a dedicated, stable, secure, and scalable environment, perfectly suited to your operational needs.

### **Complete management by Genexis**

From initial configuration to ongoing maintenance, Genexis handles all technical aspects of the virtual machine (VM) and the CloudSight application. Our expert team ensures seamless installation, robust security, and regular updates, so your system remains optimized and secure at all times.

# Product features

## CloudSight Hosting - Secure and premium hosting

CloudSight Hosting provides secure, reliable hosting services specifically tailored to ISPs, powered by AWS and managed by Genexis. Offering a fully managed, scalable hosting solution, this platform ensures the infrastructure is as strong as the service you provide.

### Enhanced security

Our hosting service leverages AWS's advanced security features, providing a highly secure environment for your data and applications. Genexis implements stringent security protocols and regular maintenance routines, safeguarding your systems against potential threats and ensuring compliance with industry standards.

### Scalability and adaptability

With AWS's powerful infrastructure, your CloudSight environment can effortlessly scale to meet evolving demands. Whether you need to increase capacity or adjust to changing requirements, our hosting service offers the flexibility and scalability essential for your business's growth.

### Seamless integration and remote management

The CloudSight application, hosted on AWS, integrates smoothly with your existing systems. It provides comprehensive tools for managing, monitoring, and controlling home networks remotely, all configured and maintained by Genexis to ensure optimal performance and reliability.

### Ongoing support and assurance

Genexis offers continuous support and assurance, ensuring your CloudSight environment operates at peak efficiency. Our dedicated support team is always available to resolve issues and provide expert advice, enabling you to focus on your core business activities.

#### Designed for purpose

CloudSight Hosting is designed with the network operator in mind. Every aspect is highly functional and easy to use.

#### Premium support

CloudSight Support is tailored to fit all needs. Full and carefree onboarding, local training and 24/7 SLA committed support.

#### No upfront investment

CloudSight is a modular, scalable and flexible SaaS solution that requires no upfront investments.
