

# CloudSight Secure

## Premium CloudSight server protection

Protect your CloudSight server with our comprehensive cyber defense solution, powered by EYE Security. CloudSight Secure offers a comprehensive range of cybersecurity services tailored to meet the unique needs of protecting your server environment. We have meticulously designed CloudSight Secure to protect your network with cutting-edge security measures. With continuous monitoring, rapid incident response, and proactive threat management, this module keeps your network safe from evolving cyber threats.

### Key features

#### Threat detection and response

##### Real-time monitoring

Constant vigilance with 24/7 monitoring of your systems to identify and respond to threats immediately.

##### Advanced threat intelligence

Leveraging the latest threat intelligence to stay ahead of emerging cyber threats and vulnerabilities.

##### Incident response

Rapid and effective response to security incidents, minimizing damage and ensuring swift recovery.

#### Vulnerability management

##### Regular assessments

Frequent vulnerability scans and assessments to identify potential weaknesses in your systems.

##### Patch management

Timely application of security patches to protect against known vulnerabilities.

##### Risk prioritization

Prioritizing risks based on their potential impact on your business operations.

# Product features

## Why choose CloudSight Secure, powered by EYE Security?

### Expertise

A team of seasoned cybersecurity professionals with extensive experience in protecting businesses of all sizes and industries.

### Innovation

Cutting-edge technology and innovative approaches to stay ahead of cyber threats.

## Why EYE Security?

EYE Security, a leading cybersecurity provider based in the Netherlands, offers state-of-the-art solutions designed to protect businesses from the ever-evolving landscape of cyber threats. With a focus on proactive and preventive measures, EYE Security ensures that your business remains secure, resilient, and compliant with industry standards.

## CloudSight Secure with CloudSight Hosting

Enhance your CloudSight Hosting experience with CloudSight Secure.

If you require extra security for your own virtual machine (VM), we recommend reaching out directly to EYE Security for customized services tailored to your specific security needs.

## About CloudSight Hosting

CloudSight Hosting provides comprehensive support for operators and ISPs, offering a dedicated, stable, secure, and scalable server environment for hosting CloudSight products.

All aspects of technical setup, certification, configuration, installation, contracting, assurance, updates, and maintenance are expertly managed by Genexis.

Our service definition and liability align seamlessly with our hosting partners, whether it's AWS, Google Cloud, or Microsoft Azure.

### Designed for purpose

CloudSight Secure is designed with the network operator in mind. Every aspect is highly functional and easy to use.

### Premium support

CloudSight Support is tailored to fit all needs. Full and carefree onboarding, local training and 24/7 SLA committed support.

### No upfront investment

CloudSight is a modular, scalable and flexible SaaS solution that requires no upfront investments.
