

Universe - 101

Fiber Connection Base Plate

The Universe-101 base plate can be used as the foundation for all active Genexis Hybrid products. Based on a universal interface, it has been designed to enable swift installation for

connections where an external FTU is already present. It reduces installation costs and optimises the customer's ease of use.

Features

- » Compact fiber connection base plate, compatible with all Hybrid Element products
- » Providing connectivity for one fiber patch cord
- » Protected and user-friendly installation of the fiber
- » Patented technology
