

Elite

Engineered to excel

Elite by name, elite by design

Speed. Precision. Endurance. Power.

These are the traits that define elite athletes—and they're the same qualities we've built into the Genexis **Elite Series**.

Whether the challenge is high-bandwidth streaming, powering a smart home or real-time gaming, Elite delivers top performance without breaking a sweat. It is designed for high speeds with optimized ventilation and antenna performance.

The Elite Series features Wi-Fi EasyMesh™ technology, dual-band Wi-Fi and a sleek Nordic design that slots straight into any home.

When performance is non-negotiable, Elite is the solution.

High-speed connectivity

The Genexis Elite routers feature Wi-Fi 6 technology and Wi-Fi dual-band, ensuring high-performance connectivity.

The Elite HX40 features signal rates up to 1200 Mbps (2.4Ghz) and 2400 Mbps (5GHz).

The Elite HX30 features signal rates up to 600 Mbps (2.4GHz) and 2400 Mbps (5GHz).

Key features

The Elite Series is versatile, featuring voice functionality.

The Elite HX40 sports 1x 2.5GE WAN port and 4x 1GE LAN ports.

The Elite HX30 sports 1x 2.5GE WAN port, 1x 2.5GE and 3x 1GE LAN port.

Seamless extension

Extending your Wi-Fi coverage is simple with Elite. Wi-Fi EasyMesh™ technology ensures automatic integration of your Wi-Fi devices, and optimizes load balancing between access points.

Blends into your home

Wi-Fi performs best in the open, so the Elite is designed to be shown. Its sleek Nordic design, soft fabric finish and color options ensures that it blends effortlessly into any interior.

Powered by IOWRT

IOWRT is Genexis' award-winning open-source operating system. It allows service providers to develop their own unified software layer across gateways and routers.
